2027 - Visit to your School

In 2024, we noticed the same challenge coming up in conversations with local schools: even when outdoor activity venues were nearby, transport costs and logistics could make trips difficult to organise.

That's why we invested in our Mobile Climbing Wall, allowing us to bring the adventure directly to your school.

Subject to suitable access and space, our team can transform your school grounds into a multi-activity adventure day, with activities including Mobile Climbing, Archery (traditional or soft archery depending on your site) and a range of Team Building and Problem-Solving Challenges. By bringing the activities to you, we can help reduce transport costs and organisation while still giving pupils an exciting, active and memorable experience – right on your doorstep.

Mobile Climbing Tower

Our climbing tower has 4 lines, and all run manually. This gives children a more confident and more achievable climb (as opposed to some walls with auto belay systems). We have quick adjust harnesses meaning quick turnaround (and some 'small children' ones as well). Our team has become very efficient at running a day but there are limitations and so we have lots of options. Possible in groups of 10 or 15.

SOME SCHOOLS ASK US TO WORK WITH A CLASS IN THE MORNING AND ONE IN THE AFTERNOON, SOME ASK FOR 4 CLASSES IN A DAY. WE HAVE EVEN WORKED WITH 210 YEAR 7 STUDENTS IN A DAY

Our climbing team...

Archery or Soft Archery

Traditional Archery

Led by one of our experienced instructors, pupils learn the basics of safe shooting, including stance, aiming and technique, before putting their skills into practice. Sessions work best with groups of around **10 - 15 pupils at a time**.

Once everyone has mastered the basics, we introduce a range of **fun archery games and challenges** to keep the session exciting. These can include accuracy competitions, scoring challenges, team games and other target-based activities.

Soft Archery

Our soft archery setup uses bows with **rubber sucker arrows** and up to **five targets**, making it a great alternative where traditional archery may not be suitable for the school grounds. It works particularly well with groups of **10-15 pupils** and is accessible to a wide range of ages and abilities.

We can lead the activity ourselves, or **school staff can run soft archery** using the guidance and instructions we provide. Pupils still learn the basic principles of archery before moving on to **games, team challenges and friendly competitions**.

Both versions can work brilliantly as part of a rotation, giving pupils something that feels different, challenging and very rewarding.

To make a day more cost effective for your school we are able to offer the option for some activities which can be self-led. This makes the day cheaper for your school whilst maximising the choice of activities.

Our school day for you would work in a rotational format, with potential timetables further on in the document, of course we could just bring the wall with instructors whilst your school could provide other activities on the day - we offer highly flexible options.

Examples of archery games + soft archery includes a coconut shy

Team-building and Problem-Solving

Our problem-solving sessions are designed to get pupils **thinking, communicating and working together** through a series of practical team challenges.

Sessions work best with groups of around **10-15 pupils**, with either a Venture Out instructor leading the activity or school staff running the challenges using the guidance we provide.

We have around **10 different problem-solving activities**, each designed to test skills such as **teamwork, communication, leadership, planning, decision making and perseverance**. Pupils will need to listen to one another, share ideas and work out the best way to complete each task.

The challenges are varied, active and fun, with plenty of opportunities for pupils to take on different roles within their team. They can also be adapted to suit different ages, abilities and group sizes.

These activities work particularly well as part of a **multi-activity rotation**, and many of them can also be run **indoors**, making them a great option for winter months or wetter days.
